VALIDATION REPORT · TEXT GENERATION

HunyuanOCR

on M4 Pro 64 GB · 8-bit (Q8_0) · Ollama / LM Studio · Chat

STATUS · NOV 22, 2026

Validated

5 of 5 checks pass

HunyuanOCR at 8-bit runs on the M4 Pro 64 GB with 128K of context at about 138 tokens a second.

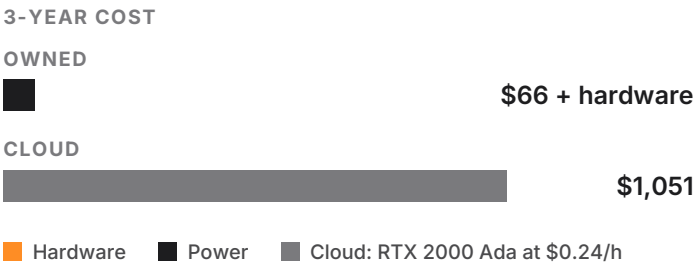

VALIDATION

CHECK	TARGET	RESULT	STATUS
Fits in GPU memory	48.0 GB usable	13.6 GB needed	PASS
Headroom	5% free	34.4 GB free (72%)	PASS
Context for chat	16K or more	128K	PASS
Writing speed	15 tok/s or more	138 tok/s	PASS
First reply	under 3 s, 2K prompt	0.7 s	PASS

Targets: a reply you can read along with, a first reply the use case tolerates, and 5% of memory left free. Calculated from published specs, not benchmarked.

BUDGET

HARDWARE, ONE-TIME	MSRP not entered
POWER, PER YEAR	$22 · 84 W at the wall
CLOUD INSTEAD, PER YEAR	$350
3-YEAR TOTAL, OWNED	Hardware + $66 power
3-YEAR TOTAL, CLOUD	$1,051
BREAK-EVEN	Needs the hardware MSRP

Budget basis: 4 h a day, power at $0.18 per kWh, cloud at RunPod on-demand prices as of Nov 22, 2026. Hardware at the MSRP entered in the calculator, not a GPU Partner quote. A 3-year view; resale value, staff time and taxes aren't counted.

FREE	34.4 GB

HOW TO RUN IT

LLAMA.CPP	`llama-server -hf prithivMLmods/HunyuanOCR-1.5-GGUF-Updated`
VLLM	`vllm serve tencent/HunyuanOCR`
MODEL CARD	huggingface.co/tencent/HunyuanOCR

METHOD AND ASSUMPTIONS

Memory is the weights (parameters times bits per weight, read from each model's config.json), the context cache for every chat, and the runtime, against the memory this GPU can use after the OS and display take theirs. Writing speed is memory bandwidth over the bytes read per token, plus a per-layer latency, calibrated against llama.cpp benchmarks. First reply is the prompt's FLOPs over the chip's dense 16-bit TFLOPS at the runtime's measured efficiency. Running cost is power at the wall at your rate and hours; the cloud figure is the cheapest RunPod on-demand GPU that runs the same job. Accuracy: memory lands within about a gigabyte; speeds and times are rough, about ±25%. Model data and hardware specs checked Nov 2026; cloud prices are RunPod's on-demand list as of Nov 22, 2026. Report VR-1RHH5LT, generated November 22, 2026.
